**EZDIGIMAGIC PORTABLE DVD BURNER NOW DOWNLOADS DIRECTLY
FROM CAMERA & CAMCOORDER**

EZPnP™ announces the addition of direct camera-download capability to its established line of EZDigiMagic™ portable digital backup products. The EZDigiMagic™ DM220- U08 is the newest portable DVD/CD burner from EZPnP™, and it has the added convenience of a USB host function. In addition to the traditional memory card-to-DVD/CD backup, users now have the ability to download pictures and video directly from their cameras to a DVD or CD. And just like all previous EZDigiMagic products, no computer is needed. This is very important for law enforcement applications as files are copied directly from a memory card or camera. They cannot be altered by a computer, thus helping to maintain chain-of-custody in handling photo and video evidence.

Besides providing a direct camera interface, the USB host feature will allow DM220-U08 users to share files between USB storage devices (i.e. USB flash drives, or external hard drives) and a DVD or CD disc. Files can be transferred in either direction: from flash drive to CD/DVD, or vice versa. The DM220-U08, is easy to use. Whether you're connecting to a camera, inserting a memory card, or plugging in a USB flash drive, the product's one-touch controls will allow you to begin backing up your files in minutes.

The EZDigiMagic™ DM220-U08 weighs less than two pounds, and can be powered by four rechargeable Ni-MH batteries—making this unit completely portable. It can also be powered by a convenient car-kit (optional) or an AC adapter. Through a USB 2.0 cable, the DM220-U08

MORE

can be used as an external DVD burner or a player for your PC or Mac. The DM220-U08 is currently in stock, and has a suggested retail price of \$359.00.
